## USB Tape Dispenser saves you desk space

While at first I thought the [USB scotch tape dispenser](#) was either an overpriced way to tell your computer to dispense tape, or just a rather unneeded invention, but seeing it in action it seems like a good idea. It's a normal tape dispenser, but with a USB hub built-in, so you're only giving desk space to one thing, and it can be handy to have a hub that has a little gravity to it. The other smart thing is, the hub ports are on little swivel mounts, so you can flip them out in a more convenient direction to keep your cables organized better. Comes in silver, sand and pink candy stripe. [GT]
