Leather Mouse and USB Hub Add Class to Your Workspace

No matter how you use or wear it, leather is always a hallmark of quality and distinction, which is why we love this very sophisticated-looking mouse and [USB](#) hub, from Earth Trek. The mouse is the two-button style, with handy scroll wheel. The four-port USB hub looks exactly like the mouse, sans buttons and wheel. We wanted to suggest either one as a great Father's Day gift, but strangely, pricing and availability could not be found on the Earth Trek website, which is based in Hong Kong. We still hope these elegant accessories make their way to US shores soon...
